If you are hired as Web Developer, your work will be to automate WriteSoft's Internal Content Developing Processes

Task for getting selected –

- 1) Prepare Client's form

Prepare Client's form

There are many internal processes, and one of which is assigned to you as the task. You have to make a simple form in which Client can enter few data and check the On-Going Projects as well.

All the things are described below -

Client XYZ

Add Project

View On-Going Projects

Add Project

Enter Topic

Enter Number of Words –

Additional Information -

If the Client enters more than 1000 words, display a popup that maximum allowed words are 1000 only

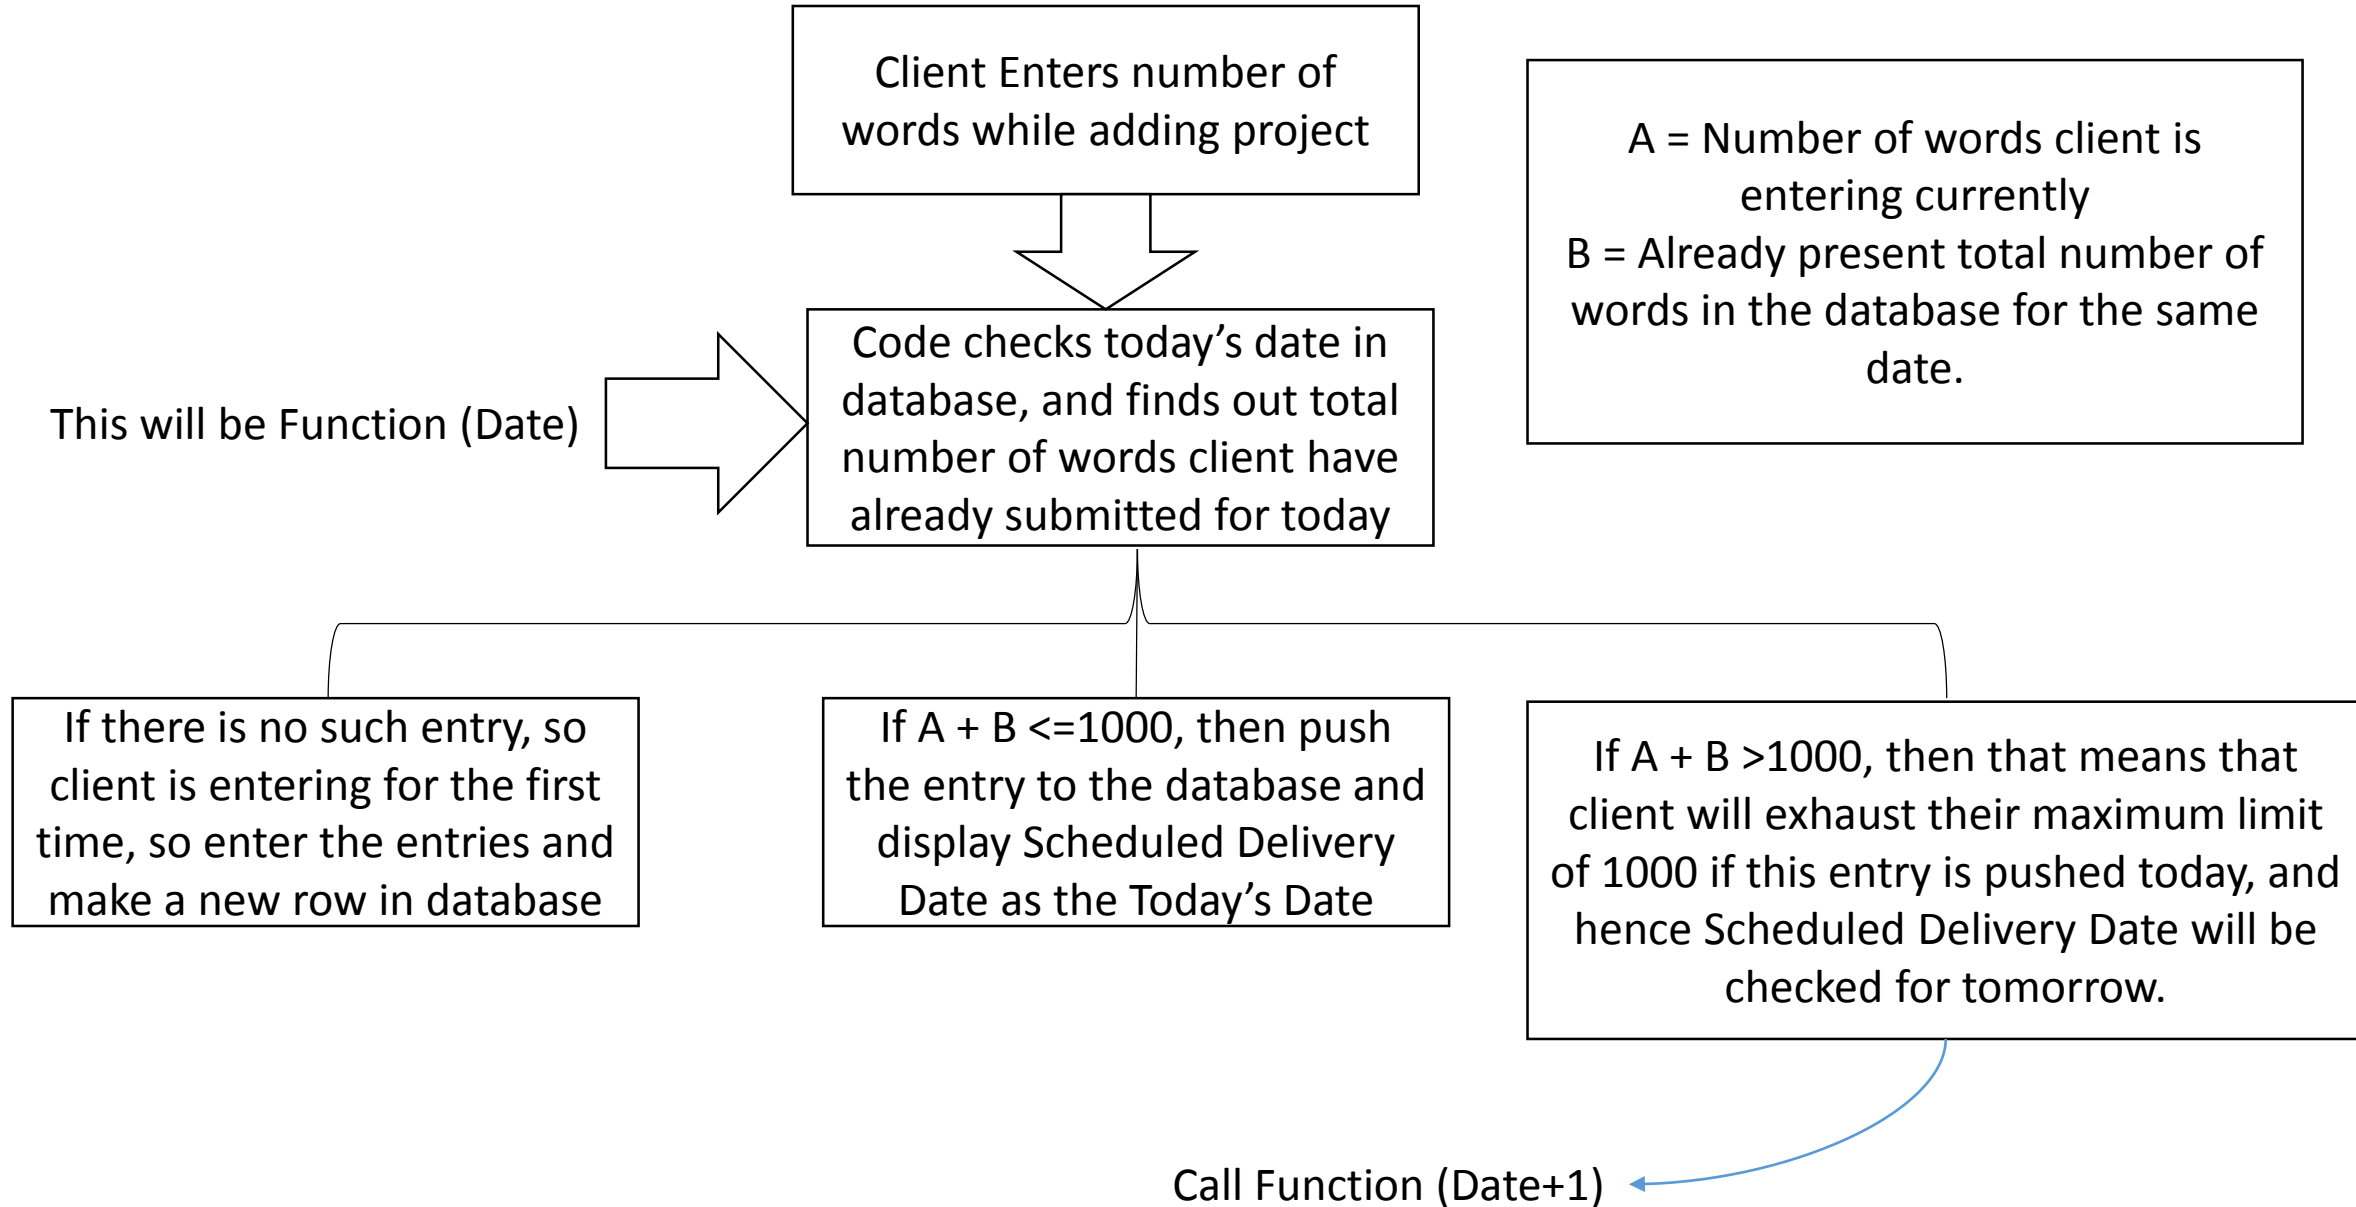

View On-Going Projects

Topic	Number of Words	Instructions	Scheduled Delivery Date
How to do SEO	1000	ABCXYZ	25 th November, 2019
Pitfall	500	ABCXYZ	26 th November, 2019

In On-Going Projects, there will be 4 fields, 3 of which are already entered in the database by client, and 4th is the one which is most important for you to get selected. Calculating Scheduled Delivery Date is the heart of this assignment.

If you miss out on one or other thing, that's okay, but Scheduled Delivery Date should run fine.

Logic to calculate Scheduled Delivery Date (Maximum Delivery from WriteSoft to Client is 1000 words in a day)

Test Case 1

Topic	Number of Words
ABC	50

Database Situation before pushing the words

Scheduled Delivery Date	Topic	Number of Words	Instructions
